

Principal Level Power/Electrical Engineer

At H2E, everything grows: people, skill sets, careers and you. We're in need of a principal level power/electrical engineering talent.

H2E is a growing electrical engineering consultancy firm located in the Spokane, Washington area. Our culture supports (and insists on) excellence in engineering, project management, teamwork and leadership. We are intentional about ongoing skills development – our clients and your potential demand nothing less.

Industries we currently serve include Mining, Light Metals, Hydro Electric, Cement, Aggregates, Water and Waste Treatment Plants, Electric Utilities, Dept of Energy, and Wood Products. We are currently looking for a full-time Principal Power/Electrical Engineer to work and grow with us.

About Your Work:

In a performance-driven, team environment, you will:

- Provide engineering, process and talent leadership to engineers, designers, and project managers in support of corporate values and client objectives.
- Model engineering excellence and inspire team members to grow.
- Anticipate technical and project management challenges, managing them before they impact the client.
- Perform and direct power system engineering
- Interacting with contractors, clients, and facility operators
- Commission power system upgrades
- Manage project team activities, communicating changes and progress.
- Assist with proposal development for professional services, preparing and managing scopes, budgets, and schedules.

What You'll Need:

- 15 years of success with a Consulting Engineering firm or an industrial/utility environment
- Bachelor's Degree in Engineering from an ABET accredited program
- Proven knowledge of electrical power system modeling techniques. ETAP, SKM, and/or EasyPower experience
- Substantiated expertise in design of medium voltage industrial and utility power systems
- Ability to develop and communicate technical information to both clients and customers
- Ability and willingness to travel to client sites for project scoping, commissioning and startup
- PE licensed preferred or ability to obtain PE license

How to Apply:

Please review the position posting and respond with cover letter and resume.
