

# H2E SUPPORTING CRITICAL INFRASTRUCTURE UPDATE

April 21, 2020

As the impact of the COVID-19 pandemic extends, H2E continues to maintain our support for facilities and operations. H2E has established effective means of providing electrical engineering and automation support in a prompt, safe, efficient manner.

If you need support, please contact us immediately. Remote access is the best solution. If site access is required, a prudent, site-specific plan will be co-developed that addresses both your and H2E's requirements to limit exposure. Our commitment to safety remains our highest priority.

Please contact your H2E Liaison listed below via phone or email. If you do not have an H2E Liaison, please contact anyone on the list...we are here to help you!

Jesse McDaniel	208.659.5354 <a href="mailto:jmcdaniel@H2Einc.com">jmcdaniel@H2Einc.com</a>	Troy Pefley	509.998.4084 <a href="mailto:tpefley@H2Einc.com">tpefley@H2Einc.com</a>
